Lab Safety Activity

(Notebook)

## \*\*DO NOT WRITE ON THIS!!!!!!!

## 1. For your INPUT: RIGHT: - Copy down your scenario.

2. Also, Answer:

- A. What rule is being broken?
- B. Why is this scenario unsafe to do during lab?
- C. What should the student have done instead?

4. Then, on the <u>LEFT SIDE</u>, your <u>OUTPUT</u>, draw what the student(s) should have done instead, to be safe in lab.

## \*\*\*\*\*\*\*STOP HERE UNTIL FURTHER INSTRUCTIONS\*\*\*\*\*\*\*\*\*\*\*

## Whiteboard Meetings

Each group will have a whiteboard:

- 2 people will draw.
- 1 person will write.
- 1 person will present (speaker).
  - Divide your white board in half by drawing a line down the middle.
  - On the right side, draw your UNSAFE scenario and right the description of your scenario.
  - On the left side, draw your scenario the way you made it SAFER.

- 1. Gina is thirsty. She rinses a beaker with water, refills it with water, and takes a drink.
- 2. It is rather warm in the laboratory during a late spring day. Anna slips off her shoes and walks barefoot to the sink to clean her glassware.
- 3. While washing glassware, Mike splashes some water on Evon. To get even, Evon splashes him back.
- 4. During an experiment, Lindsey decides to mix two chemicals that the lab procedure does not say to mix, because she is curious about what will happen.
- 5. Will takes off his goggles during a lab using dangerous chemicals because he says he doesn't like the way they make him look.
- 6. Betty has very long hair and doesn't pull it back when doing a lab experiment that uses fire.
- 7. The teacher is giving directions for a lab. Mark and John are talking during the directions and not paying attention to what they should do.
- 8. Jonny comes into class and immediately starts touching the lab equipment set up for the day before any instructions are given.
